Access 250+ SMS and Aggregator interconnects providing quality routes

Same day settlements on any invoice value for improved cashflow

# Bank of Telecom Value Added Services

Included in your Bank of Telecom Member fee of \$250 is access to a portfolio of value-added services to help make informed decisions based on market conditions, as well as increase your sales. Non-members can also access the services, subject to a small fee.

It only takes 24 hours to verify new registrations for the Bank of Telecom and with account management teams based UK, Europe, Latam and China branches, we're here to help you make the most out of your voice and SMS business. Bank of Telecom is a great place to trade automatically helping to increase operational efficiencies, reduce overheads such as billings and collections, while saving on international settlements and freeing up your cash. We look forward to welcoming you to the Bank of Telecom soon!

## Take control and maximise your revenues today with:

### Global rate checker

Make informed commercial decisions by accessing our global rate checker for any destination

### Destination monitoring and reporting

For your deals you can monitor and check performance in real time or a customised date range, giving you statistics such as volumes, ASRs and DLRs, FAS, PDD, CLI and more

### Direct and wholesale SMS testing

Test any direct and wholesale route by selecting sender ID type, SMSC, SMS type and DLR (gateway or handset)

### CLI/NCLI voice testing

Run destination reports showing FAS, PDD and CLI, and you will also receive an audio file with NCLI tests

### HLR look up

Run one destination report up to 10,000 numbers per month

### Voice traffic cleansing

Improve stats on your voice routes to prevent negative calls affecting performance, so helping to increase quality and sales

### Voice transcoding

By raising your ASR% for the route will help build your traffic. Transcoding allows for termination of all calls from different codecs to a single codec
